

CTF - 800

FORM, FILL & SEAL MOBILE BAGGING LINE

The system integrates within three standard 40ft shipping containers, providing a 'complete plug-and-play' solution. It comprises a two-floor structure designed to create 'optimal space utilisation'. On the second floor, the infeed dosing/weighing system is situated directly above the primary automated machinery. On the ground floor, the form fill and seal machine is said to guarantee 'precise automation' in the packaging process. This is enhanced by a robotic palletiser. A wrapping cell on the ground floor completes the packaging process.

Personnel required
One to supervise line and one to load

PRODUCT SPECIFICATIONS

Max throughput	800 Bags an hour*
Bag sizes	Up to 680mm x 480mm
FFS reel size	1000mm (l) x 600mm (d)
Dimensions	1 Container footprint 40ft x 8ft

Suitable products

Salt, Aggregates, Wood pellets, Animal feed, Peat/Compost, Coal.

Equipment includes

Includes Bulk product in-feed by means of Bulk hopper and conveyor or Bucket elevator, Weighing systems, Vertical Form, Fill and Seal System, Full ABB Robot Palletising System, Pallet Stretch Wrapper with optional Top Sheet Applicator.

Independent air supply

Air compressor and receiver
