

# LTM - 600

## SEMI AUTOMATED MOBILE BAGGING LINE

The LTM-600 combines manual placement of pre-made bags with a robot palletising system. This particular model allows users to switch between bag sizes with freedom, making this line extremely versatile, particularly with pre-packed aggregate suppliers who pack various branded aggregates. The ABB robot palletising system includes pallet magazine and pallet accumulation. Filled pallets are ejected from the line through a controlled speed door, and onto gravity conveying. Also included is a compressor to deliver the correct air supply to the line, and a heating system to maintain an ambient temperature and warm environment for bagging.

**Personnel required**  
One to supervise line and one to load

### PRODUCT SPECIFICATIONS

<b>Max throughput</b>	600 Bags an hour*
<b>Bag sizes</b>	Up to 680 x 480mm
<b>Power supply</b>	120Kva 100 amp 3 phase diesel generator
<b>Stacked pallet height</b>	1600mm

#### Suitable products

Aggregates, Grit Salt, Wood pellets, Animal Feed, Dry top soil and compost

#### Equipment includes

Standard shipping container, Manual bagging system, ABB Robot palletising system.

#### Independent air supply

Air compressor and receiver
