

RBP - 700

RMGroup's automated robot bag placer combines our in-depth experience of industrial robots and a wealth of bagging knowledge, the RBP-700 represents a fully automated solution to most bagging requirements. Our solution is to offer an upgraded machine for the repetitive task of manually placing bags on a filling spout with an equally flexible method of bag placing using a 6 axis robot.

PRODUCT SPECIFICATIONS

Bags per hour	600 P/hour
Sack size	Up to 900mm
Sealing type	Continuous Heat/Stitched
Bag capacity	Upto 500 Bags*
Power supply	32amp

Bag material

Plastic/Paper/Polypropylene/Polyethylene

*Product Dependant

BP - 800

System features include the latest patented innovations that provide consistent bag positioning and alignment, therefore improving reliability of placement of open mouth bags. The BP-800 is fully automatic and suitable for handling free flowing bulk products.

PRODUCT SPECIFICATIONS

Bags per hour	900 P/hour
Sack size	Up to 1000mm
Sealing type	Continuous Heat/Stitched
Weighing capabilities	10- 50Kg
Bag capacity	Upto 2000 Bags
Power supply	32amp

Bag material

Plastic/Paper/Polypropylene/Polyethylene
